TRITON PCS
QUARTERLY E911 IMPLEMENTATION REPORT
November 1, 2005

Triton PCS License Company L.L.C., d/b/a SunCom Wireless, and Triton License Newco L.L.C. (collectively, "Triton"), by their attorneys, hereby submit this quarterly enhanced 911 ("E911") report to the Federal Communications Commission ("Commission") pursuant to the Commission's decision to afford Tier II carriers additional time to meet their Phase II E911 obligations.¹ In this report, as required by the *Order to Stay*, Triton updates the status of its E911 Phase I and Phase II deployment progress.²

I. STATUS OF PENDING E911 PHASE I AND PHASE II REQUESTS.

Triton currently operates a wireless network that covers approximately 13.6 million people in Virginia, North and South Carolina, northeastern Tennessee and northern Georgia.

¹ Revisions to the Commission's Rules to Ensure Compatibility with Enhanced 911 Emergency Calling Systems, Phase II Compliance Deadline for Non-Nationwide CMRS Carriers, Order to Stay, 17 FCC Rcd 14841 (2002) at ¶¶ 28-31 (hereinafter "Order to Stay"). Tier II carriers are defined as non-nationwide carriers that had over 500,000 subscribers as of year-end 2001.

² As required in the Order to Stay, Triton is providing this quarterly report to the Executive Directors of APCO, NENA and NASNA.

This service area covers six major trading areas (“MTAs”) and thirty-six basic trading areas (“BTAs”), primarily in rural and secondary markets.

On December 1, 2004, pursuant to the closing of the first stage of an Exchange Agreement entered into on September 21, 2004 (the “Exchange Agreement”) with AT&T Wireless Services, Inc. (“AT&T Wireless”) and Cingular Wireless, LLC (“Cingular Wireless”), Triton transferred PCS network assets held for use in its Virginia markets to AT&T Wireless and Cingular Wireless in exchange for PCS network assets held by AT&T Wireless for use in certain of its North Carolina markets and in Puerto Rico and the U.S. Virgin Islands and the payment by Cingular Wireless to Triton of \$175 million. In addition, the parties entered into leases under which each party has the right to access the PCS spectrum under certain FCC licenses associated with the transferred network assets, pending the transfer of those FCC licenses at a second closing.

Triton currently is in the process of integrating the newly acquired markets and converting the divested markets. Once the transition is complete, Triton will operate a wireless network covering approximately 18.3 million people in 31 BTAs. Triton previously reported that it expected its February 1st, 2005 filing could be the last filing reporting on the divested Virginia properties. The transfer of licenses associated with the Exchange Agreement has not yet occurred. For this reason, Triton’s current filing encompasses the same markets as previous reports. Cingular has, however, contacted the PSAPs in those markets for which they will obtain former Triton licenses, and has communicated its intent to change the E911 Phase II network solution in place to one of its own design. Triton continues to work with Cingular to assist during this transition and continues to maintain the currently deployed architecture.

Triton continues to make significant progress in its efforts to deploy Phase I location capability services. To date, Triton has received 203 requests for Phase I service. Of those

requests, 187 are in service and 16 are pending. For these 16 outstanding requests, the following summary outlines their status:

Current Status	Count
PSAP and Triton mutually agree that the PSAP is not ready for various reasons, including LEC, CPE, selective router and database issues or a PSAP is simply not ready to integrate at this time or PSAP has withdrawn its request	8
Ready to deploy, mutually agreed-upon schedule in place	7
Less than six months old – in planning stages	1
Total	16

For specific details regarding outstanding requests, including details applicable to each request that has been pending for more than six months, please refer to the Appendix to this report³.

Triton also is making significant progress towards fulfilling requests for Phase II service. To date, Triton has received 154 Phase II requests. For the requests that came due during the preceding quarter or earlier, either Phase II service has been deployed, a mutually agreed-upon schedule for deployment has been arranged between Triton and the PSAP entity, or Cingular and Triton jointly have obtained or are in the process of obtaining a new schedule for deployment for the licenses that Cingular will acquire pursuant to the Exchange Agreement.⁴ Accordingly, Triton has met its deployment benchmark for the period preceding this Quarterly Report to the extent indicated by the information above and in the Appendix.⁵

³ On August 18, 2005, Triton received an “Import Exceptions” report (the “Exceptions Report”) from the FCC regarding the Appendix filed with Triton’s last quarterly report. The Exceptions Report noted an error in the data provided for the City of Jacksonville, NC PSAP. This discrepancy has been resolved in the attached Appendix.

⁴ On September 9, 2005, Cingular filed a petition for a temporary waiver to cover four Virginia PSAPs with which Triton and Cingular had not yet reached agreement for new deployment dates. Agreement was subsequently reached with all but one PSAP: York County, Virginia. Thus, on September 13, 2005, SunCom filed a Supplement in Support of Petition for Limited Waiver which narrowed the scope of Cingular’s earlier waiver petition to York County. This waiver request remains pending.

⁵ See Revision of the Commission’s Rules to Ensure Compatibility with Enhanced 911 Emergency Calling Systems, Petition of City of Richardson, Texas, Order on Reconsideration, 17 FCC Rcd 24282 (2002) at ¶ 2 (“Finally, we clarify that nothing in our rules precludes wireless carriers and PSAPs from mutually agreeing to an implementation schedule different from that prescribed by our rules.”).

The attached Appendix includes information on all pending requests for Phase I and Phase II service received from individual PSAPs in the format required by the Commission.⁶ This Appendix lists the name of the PSAP, the date the request was received, whether or not the request is valid, and the status of the request.⁷ To the extent any request has been pending for more than six months, the appendices list specific reasons for the delay, steps taken to resolve the problem, and anticipated date of full completion of the necessary work.⁸

II. CHANGE IN REPORTING PERIOD

In previous quarterly reports, Triton has made every effort to reflect Triton's E911 deployment progress as it stood on the date of the report's submission. This necessarily created a rush at the end of the reporting period to collect and accurately report "real time" deployment data. To provide additional time for internal review of the data prior to reporting, Triton is establishing, beginning with this report and continuing on a going forward basis, a data "cut-off" date that will be approximately two weeks prior to the filing date of the quarterly report. Thus, the current report reflects deployment data current as of October 18, 2005, as is indicated on each page of the Appendix.

⁶ Wireless Telecommunications Bureau Standardizes Carrier Reporting On Wireless E911 Implementation, *Public Notice*, CC Dkt. 94-102, DA 03-1902 (rel. Jun. 6, 2003).

⁷ *Order to Stay* at ¶ 29.

⁸ *Id.*

III. ADDITIONAL QUESTIONS

Should there be any questions or if any additional information is required, contact the undersigned.

Respectfully submitted,
